HOW BEN BUTLER GOT RICH. Young Men of To-day May do Likewis If They Follow Advice Given.

General B. F. Butler being asked for some suggestions on gaining success, stated that when he was a young lawyer, practicing in Lowell, Mass., a bank president advised him to take his little deposit and buy real estate, from which he could be deriving some revenue. The general said that he had but little money and was uncertain as to bis future. General B. F. Butler being asked for

general said that he had but little money and was uncertain as to his future.

"Never mind," said the bank president, "go to the next public auction of real estate, hid off a lot with a building of some kind on it, pay down what money you have and give your promisory notes for the balance. You will come out all right."

Georgia Butler says this advice was

General Butler says this advice was good. When a man has obligated himself, by his notes, to pay money at a certain time, it inclines him to economy. He followed the advice, and in time became the owner of several parcels of val-uable real estate in Lowell.

Two classes will not be likely to heed such advice—the improvident and the over-cautious. The latter will be apt to say: "It would be all right but for those dreadful promissory notes. They are always running on and if a man falls sick they do not wait for him to get

There is this danger, of course, but one can make no business venture without some risk, and with the knowledge acquired by recent investigations of the cause of most ordinary ailments, and the means of cure, one runs little risk from that source. It is now known that most of the common ailments have their ori-gin in deranged kidneys. They are the chief blood purifiers of the system and when disordered a breaking down somewhere is soon inevitable, because the poison, which in their healthy condition is eliminated, is carried through the entire system.

Put them in order and health returns C. D. Dewey, a successful man, president of the Johuston Harvester Company, Batavia, N. Y., gives his experience as follows:

ence as follows:
In 1882 my health was failing, my head pained me constantly, my appetite was uncertain, I could not sleep soundly. was uncertain, I could not sleep soundly. I attribute this to the extreme pressure of business cares, but I grew worse, and finally was confined to my bed for two months. It seemed as though I would "never recover" my former health. Under the aid of stimulants I gradually gained strength, so that in a few months I was able to attend to business, but I was able to attend to business, but I was able to attend to business, but I was all walk only with the assistance of a I was able to attend to business, but I could walk only with the assistance of a cane, and then in a slow and unsteady manner. I continued somewhat in the same cendition until February last, when I used Warner's safe cure. It has cured me. I consider it a valuable remedy and can highly recommend it.

Young men have but to use ordinary prudence, and when any derangement occurs if they use the same means as did this successful lusiness man, they may hel a constant assurance of their ability to carry to successful conclusion all or-

to carry to successful conclusion all or-dinary business projects, including the care of their promissory notes when due.

WHO WRO IE SHAKESPEARE? Bow the Element of "Poubt" Leads to Grand Achievements.

The world is agitated again over the question of who was the author of Shakespeare's plays.

The world is full of doubting Thomas-

The man who has been successful in The man who has been successful in exciting the present momentary interest in the subject is, like most successful agitators, an Irishman. He claims to have discovered a cipher running through the Shakespearian plays which proves them to have been writen by Lord Bacon. It is also claimed that there is a cipher in the epitaph on the moss-grown tomb-stone, which, properly interpreted, leads to the same conclusion.

This age shows a decided inclination

to pry into mysteries

It can make no difference to Shakespeare now whether the world believes he wrote the plays that bear his name

The plays are immortal.
Ignatius Donnelly cannot rob us or these grand works, even though he should succeed in robbing Shakespeare of his

Were it not for doubting Thomases many of man's great accomplishments would never have been brought to suc-

Men have been stricken down without warning. Doubt put in motion the investigation which ascertained the cause. vestigation which ascertained the cause. After the discovery of the cause, the world was ignorant of any remedy with which to stay the terrible slaughtes of humanity, and medical science said it was impossible. Be bed the way to the light, and Warners are cure solved the seemingly unsolvable problem. Its friends tell us with conclusive proof that the unsuspected kidney disease befouls the blood and causes most of our diseases!

For years the heart was looked upon as the most important organ in the b but doubt led to further inquiry, which developed the fact that the kidneys are the real blood-purifiers of the system and these organs now attract the first attention of the careful practitioner. It is now a recognized fact that if they are put in a healthy state by the use of that remedy possessing such wonderful cura-tive and cleansing powers most of the prevailing diseases of the system will be easily overcome, since their cause will be

How unimportant, in comparison with such problems, is the present discussion to the authorship of Shakespeare!

Lucky Old Tars.

The fly that once through Tara's balls. The soul of music shed, Now sticks as mute on Tara's walls As though that soul were dead.

And yet mathinks old Tara's bears Rejoices at the change,
For Tara's head to densely hald
Where him are went to range.

"WITH BUBBLING GROAN!" A Fatal Scase of Security Awfully Bout-

"A wet sheet and a flowing sea, a breeze ches and

From his look-out the faithful eldcaptain of yonder merelmettish chats an
uneasy glance at the distant horizon;
See! yonder a small speck of cloud "nolarger than a man's hand." He watches
it with his piercing eye for a few finements, then reaches for his long eyeglase.
To his experienced view, this harmlesslittle cloud betokens danger.

Acress his brosted face there comes a
look of determination, and, with quick
orders to the seamen, the craft is put
about and all sail made for the searest
harbor, where in apparent safety the
anchor is dropped, and the band;
mariners watch the approaching sterm

"A FRIEND OF MINE."

Whith Engireles toe Entire Globe

Travelers who have gone "far countries for to see" say that they find human na-ture pretty much the same all the world

They find wide variance in color of skin, in physical contour, in mental charact pristage, but in the essential elements that control social conduct, the human smilly is a brotherhood.

The law, unwritten, found in no statests book, enforced by no court decrees, but having an influence circumscribed only by the limits of earthly—ace, is the haw of kindness.

Among peoples where cruelly to human aiml is atmost a fixed habit, who are relentless fees, and as friends scarcely less to be draaded, whose navage natures revel in fendish atrocities, there yet ingers the spark of divinity which lifts can above the beasts.

Serrow melts the human heart whenever found, and sympathy mingles its

ever found, and sympathy mingles its team with grisf all the world over. Where pity does not dwell, there lives no thing of human kind. It is "the touch of sectors that makes the whole world

What a terrible world this would be to five in were it not for the sympathy and taving kindness shown us when sorrow comes, for it is decreed that in all lives "some days must be dark and dreary." The '19,600 and more voluntary testimentals the preprietors of Warner's safe time have received in regard to the shauy of that remedy, reveal "this such of nature" in a peculiar manner. The great majority of them acknowledge that it was through some kind friend when in pity for their suffering, had made known to them the wonderful merts of this great remedy.

The testimonials of Capt. Geo. B. Witchnie of Philadelphia, is a fair sampe. He was put ashore from his ship tedie of a fever resulting from kidney and liver trouble, and as physicians could at help him, there seemed no hope foshim. But he says "A friend of mine, who happened into port, came to see the 'mo happened into both of the world, ounding out lives of usefulness, makin the world happier and better, who would have long since passed to the ether hore, had it not been for the loving kidness of friends, shown in the practical vay, as these testimonials could be the cher hore, had it not been for the practical vay, as these testimonials could all quarers of the globe afford
